

## Bayan Training Management System

### Introduction

Bayan® Training Management System gives the establishment the ability to manage the entire process of new or existing employee training, taking into consideration the training targets, needs, cost, schedule and evaluation. The system provides wide spectrum of customized reports. Bayan Training Management System is fully integrated with Bayan HR system.

### Staff Training

- Ability to define training subjects and course calendars.
- Ability to define training needs on all organizational levels, occupations and individual level.
- System generated employee training needs based on department and occupation training needs.
- System generated employee training needs based on training evaluation.
- Comprehensive reporting on nominations, attendance frequency and evaluations.

### The Big Picture
